Re: K950852  
Trade Name: Anterior Vitrectomy Probe  
Regulatory Class: II  
Product Code: 86 HQE  
Dated: February 24, 1995  
Received: February 27, 1995

Dear Mr. Shapiro:

We have reviewed your Section 510(k) notification of intent to market the device referenced above and we have determined the device is substantially equivalent to devices marketed in interstate commerce prior to May 28, 1976, the enactment date of the Medical Device Amendments or to devices that have been reclassified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device, subject to the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against misbranding and adulteration.

If your device is classified (see above) into either class II (Special Controls) or class III (Pre-market Approval) it may be subject to such additional controls. Existing major regulations affecting your device can be found in the Code of Federal Regulations, Title 21, Parts 800 to 895. A substantially equivalent determination assumes compliance with the Good Manufacturing Practice for Medical Devices: General (GMP) regulation (21 CFR Part 820) and that, through periodic GMP inspections, FDA will verify such assumptions. Failure to comply with the GMP regulation may result in regulatory action. In addition, the Food and Drug Administration (FDA) may publish further announcements concerning your device in the Federal Register. Please note: this response to your premarket notification submission does not affect any obligation you might have under sections 531 through 542 of the Act for devices under the Electronic Product Radiation Control provisions, or other Federal laws or regulations.

Food and Drug Administration  
4200 Corporate Boulevard  
Bethesda, MD 20894

This letter immediately will allow you to begin marketing your devices as described in your 510(k) premarket notification. An FDA finding of substantial equivalence of your devices to legally marketed predicate devices results in a classification for your devices and permits your devices to proceed to the market, but it does not mean that FDA approves your devices. Therefore, you may not promote or in any way represent your devices or their labeling as being approved by FDA. If you desire specific advice for your devices on our labeling regulation (21 CFR Part 801 and additionally 809.10 for in vitro diagnostic devices), promotion, or advertising, please contact the Office of Compliance, Promotion and Advertising Policy Staff (HFZ-300) at (301) 594-4639. Other general information on your responsibilities under the Act may be obtained from the Division of Small Manufacturers Assistance at their toll free number (800) 638-2041 or at (301) 443-6597.

Regulatory Class: II  
Product Code: 86 HX

Received: February 27, 1995

Sincerely yours,

Nancy C. Brogdon  
Interim Director  
Division of Ophthalmic Devices  
Office of Device Evaluation  
Center for Devices and  
Radiological Health

Dear Mr. Shapiro:

We have reviewed your Section 510(k) notification for the device referenced above and we have determined that the device is substantially equivalent to devices marketed in interstate commerce that have been classified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device in accordance with the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against adulteration and misbranding.

If your device is classified (as above) into a class (category) of devices (or class of devices) approved, it may be marketed in interstate commerce. Existing device regulations addressing your device may be found in the Code of Federal Regulations, Title 21, Parts 800 to 809. Your device is substantially equivalent to devices marketed in interstate commerce that have been classified in accordance with the provisions of the Federal Food, Drug, and Cosmetic Act (Act). You may, therefore, market the device in accordance with the general controls provisions of the Act. The general controls provisions of the Act include requirements for annual registration, listing of devices, good manufacturing practice, labeling, and prohibitions against adulteration and misbranding. Failure to comply with the CFR regulation may result in regulatory action. In addition, we may, at our discretion, publish further announcements concerning your device in the Federal Register. Please note: this response to your 510(k) notification does not affect any obligation you might have under sections 513 through 515 of the Act for devices under the Electronic Product Radiation Control Act or other federal laws or regulations.
